Brief Description of training program:

Project Management Professional (PMP)

LIVE INTERACTIVE SESSION

PROJECT MANAGEMENT is the discipline of planning, organizing, securing, and managing resources to achieve specific goals. The primary challenge of project management is to achieve all of the project goals and objectives while honouring the preconceived constraints. Typical constraints are scope, time and budget. The secondary and more ambitious challenge is to optimize the allocation and integrate the inputs necessary to meet pre-defined objectives. Leveraging our immense experience in project management and entrepreneurship, we have launched the project management workshop aimed at all those who need to learn and implement project management, i.e. Entrepreneurs, PSUs and central and state government departments, Pvt. Sector, NGOS and Engineering & MBA students

Need of Project Management

The nation is on the cusp of a new trajectory of growth...this is the time that we need to deliver on a slew of projects to ensure continued and accelerated growth and employment generation that will deliver us the future that we dream for ourselves and our children. At the same time we cannot afford to repeat the mistakes of the past.... our past projects were often plagued with time and cost overruns of enormous proportions...as a nation, as a society...we must demand and get efficiency in the way we plan and implement projects in fact we need to build up a project mindset in all the spheres of work
